

Sports Medicine for the Student Athlete

What to do When an Injury Occurs

Injuries are a part of athletics and all sports. A majority of these injuries are minor bumps, bruises and scrapes which require basic first aid and icing. But if left untreated, even the most minor of injuries can become a big problem.

We want to keep your athlete as healthy as possible and participating in their sport when allowed. The following guidelines have been put in place to get your athlete the best care in the fastest way possible:

1. In the event an injury occurs (in or out of sport), the athlete should report it to the athletic trainer. If injuries occur during an away contest or practice the coach should be notified first. All injuries and health concerns must be reported to the athletic training staff. Medical referral will be coordinated through the athletic training staff.
2. In the absence of the athletic trainer, the coach should be notified and will initiate first aid care. The coach will then notify the athletic trainer of the injury incident.
3. The athlete is expected to come into the athletic training room daily for treatment and rehabilitation exercises until they are cleared to return to activity.
4. Injured athletes are expected to continue attending practices and games during the treatment and recovery period.
5. Parents are encouraged to contact the athletic training staff with any questions or concerns related to their child's injury care.

When Your Athlete Needs to See a Physician

The Sports Medicine Department does not replace the family physician or dictate medical care. The choice of healthcare provider always remains at the discretion of the parents. We are able and willing to help you find the best physician and medical practice for your son or daughter's injury.

A physician should be contacted if:

- Problems develop with an injury, the condition worsens or the condition persists for an extended period of time.
- All head injuries assessed as a concussion MUST be seen by a doctor — preferably a concussion specialist.

Return to Play Policy:

All athletes to be evaluated by their family physician, urgent care, ER, etc. MUST provide a note from that treating physician indicating the type of injury, course of treatment, and participation status. The note MUST be given to the athletic trainer before the athlete can resume participation. Once cleared by a physician the athlete must complete an appropriate progression back to full play at the discretion of the school's medical staff and coaches.

Sport Concussion & Traumatic Brain Injury

A concussion is a type of traumatic brain injury (TBI) caused by a blow or jolt to the head. The injury can range from mild to severe and can disrupt the way the brain normally works.

When a student athlete is diagnosed with a concussion, **they should expect to complete a 5-step progression under the direction of a physician and supervised by an athletic trainer.** Progressions are guidelines and may be lengthened or modified by the school district team physician on a case-by-case basis. **A minimum of 24 hours must pass before the next step is started.** If at any point during the progression, new or worsened symptoms develop, the athlete's progression will be stopped until symptom free for 24 hours.

BELIEVE IN WE™

Harvest Preparatory School Sports Medicine Team

What is OhioHealth Sports Medicine?

OhioHealth Sports Medicine Institute is the largest multidisciplinary sports medicine group in central Ohio dedicated to treating student athletes, college athletes, professional athletes, and the athlete in you. WE are made up of more than 200 athletic trainers at over 90 schools, with more than 60 physicians board-certified in sports medicine, primary care physicians, orthopedic surgeons, sports medicine physical therapists, occupational therapists, registered dietitians, sports psychologists, and the most comprehensive team of experts for sport concussions in central Ohio.

The Team Behind Your Team

Amaiah Jones, AT **Athletic Trainer**

Amaiah earned her Bachelor's degree in Biology from Wilberforce University in 2022, followed by a Master of Science in Athletic Training from Ohio University in 2024. The 2024-2025 academic year marked her first year as an Athletic Trainer. Amaiah takes pride in combining her experience as a collegiate basketball player with her newly acquired expertise in athletic training, allowing her to bring a unique, well-rounded perspective to her role.

Monique Brady, MD **Team Physician**

Dr. Brady is board-certified in both sports medicine and family medicine. After graduating from The Ohio State University College of Medicine, she completed her residency and sports medicine fellowship at OhioHealth Riverside Methodist Hospital. Her special interests include caring for active patients of all ages, concussion management, overuse injuries and preventative care. Dr. Brady currently serves as the team physician for Harvest Preparatory School and Pickerington High School Central. Her professional memberships include the American Medical Society for Sports Medicine, American College of Sports Medicine and American Academy of Family physicians.

Office Location:

OhioHealth Pickerington Medical Campus
1010 Refugee Rd. Suite 200
Pickerington, OH 43147
(614) 788-4222 (Office Number)

WE are dedicated to working together with athletes, their families, coaches, and other healthcare professionals to provide the highest quality of care, treatment, and rehabilitation possible and to ensure proper communication regarding the athlete's status and safe return to play.
